

LEVALART

In a glance, the LevALERT™ Indicator shows you the level of material in your bin while you remain safely on the ground. Whether you fill your bins once a year or several times a day, LevALERT™ saves you time, labor and money.

You asked for...

Easy installation: Fully assembled and ready to install from *outside* your bin

High visibility: Can be easily seen from 200 feet, day or night

No electricity required: Completely mechanical

Adaptability: Easily accessorized with an optional electrical sensor to activate horns, lights, motors, etc.

Increased safety: Virtually eliminates the need to climb bins to check their levels

A money saver: Greatly improves your operation by saving you time, wear and tear on equipment... and your body. You only need a second to check how full or, sometimes more importantly, how empty your bin is.

Install the LevALERT™ Indicator...

- anywhere along a vertical bin wall at key levels important to you
- on most corrugated or flat bin walls up to 3/8" (9.5 mm) thick
- ★ completely from outside the bin through only one 1 1/2" (28 mm) diameter hole

The Mechanics Are Simple:
As your bin material reaches the LevALERT™ Indicator, it pushes against the rubber activator, turning the color tube from black to a bright yellow color. When material recedes it automatically darkens again... ready for the next fill!

Optional Electrical Sensor:
Simply thread-on this proximity sensor to operate electrical horns, lights, motors, etc.

- No false echos from dust
- No sparks
- Add any time

AVAILABLE:
• 10-30 vdc
• 20-264 vac

ACTUAL SIZE (SIDE VIEW)

SHOWN WITH 5" RUBBER ACTIVATOR

LEVALERT™ OPERATES EFFICIENTLY AT TEMPERATURE RANGES OF +150°F (+65°C) TO SUB ZERO -30°F (-35°C)

Manufactured by LTJ Enterprises, Inc., Roscoe, MN 56781. Printed in U.S.A. ©1997 LTJ Enterprises, Inc. For Your Protection

The LevALERT™ Indicator can sense almost any granular bulk solids ranging from powders to pellets that weigh between 15 and 100 lbs./cubic foot (240-1,600 Kg./cu.M). Typical uses include: agricultural grains and feeds, plastic pellets, fertilizer, minerals, various cement powders & sand, etc. ... just about anything you'd store in a bin.
